Recommended Archery Equipment List

General Considerations

The best gear you can bring is a pair of lungs and legs in the best shape possible. All the money in the world can't buy gear that will replace fitness. If you smoke, try your best to quit before your trip.

Use all your gear before your trip. This especially applies to boots, day pack and safety equipment. New, not-worn-in boots can ruin a trip. Making sure your day pack fits well will make your trip more enjoyable.

If you are coming with a group that is hunting in the same camp, do not duplicate items. Work with each other to organize who brings what. Everywhere we hunt requires pack stock. We want to avoid packing unneeded weight.

We pack bows in hard cases on pack stock. Pack your archery and rifle tools/parts in your personal gear to be packed on stock.

The weather in September is unpredictable and any day can turn out to be a winter day up in the high country. A large portion of our hunting area is around 11,000ft and above. Days can be warm, into the 70's, and nights below freezing.

Stay away from cotton, i.e. Carhartt, blue jeans, cotton socks, etc... When cotton gets wet it is useless and it will exacerbate suboptimal weather's effect on your body. Focus on wool and synthetics. There is a lot of newer technology clothing that is lightweight, packable, warm and dries quickly.

We recommend brands and models of specific gear in our lists. Do not construe these recommendations as the only option. We use these items personally. Because we do this for a living, our choices are on the more expensive end of the spectrum. There is always a range of prices on gear that will get the job done.

At the end of this list, we include a list of what our guides carry that can be shared. If you are on a guided hunt you can choose to not carry/bring these items yourself.

Don't hesitate to give us a call about any specific gear questions.

Boots and Footwear

1 Primary pair of waterproof hiking boots.

- Boots that are lined with Gore-Tex (usually indicated with GTX in the model name) are a good option.
- If we have indicated to you that we will be hunting our high camps, a mountaineering type boot is best. We use Hanwag Alaskas, Kenetrek Mountain Extremes, Scarpa Fuego or Wrangell, Lowa Tibets, and Meindl Alaska Hunters.
- As a less expensive option, many hunters are happy with Danner boots.
- Try to visit a retail location where you can try on different boot models. Fit is essential.
- In steep terrain, the rigidity of the sole is more important than the boot height. Wearing boots that are uncomfortably high can cause “shin bump”, an uncomfortable sore spot on your shins.
- We do not recommend plastic mountaineering boots. They are too uncomfortable when covering level ground.

1 Secondary pair of boots/shoes

- In September, a pair of Merrel type hiking shoes is great backup footwear. They are not great in wet conditions, but the reduced weight and increased breathability are nice.
- A pair of tennis shoes can even work well in September as camp/backup footwear.

4 Pair sock liners

- Thin liner socks will help you avoid blisters and allow you to pack fewer pairs of primary socks.
- We prefer ultra-thin, silk liners. Merino wool and synthetics will also work well.

4 Pair primary socks

- Even in September, the best option is heavy wool.
- If you tend to have warm feet, bring lightweight wool socks in place of your liner socks. If the weather is warm, you can just wear the lightweight socks.

Gators (Optional)

- Great in snow and/or rain. Also great when dealing with high, frosty or dewy vegetation
- Keep your boots and feet dryer

Base Clothing

3 Pairs of long underwear sets

- Synthetics and merino wool are good options
- Get different weights so you have flexibility for temperatures
- You will not need heavy, wool long underwear
- You can substitute synthetic boxer shorts if you know you run warm

All clothing, except base clothing, should be camouflage. We use mostly predator and outfitter camo patterns. Both Sitka and Kuiu patterns work well. Other patterns also work well.

Bring quiet gear. If it goes “swoosh” when you move, don’t bring it.

Daily Layers

2 Lightweight hunting shirts

1 Mid-weight hunting shirt

2 Pair lightweight hunting pants

- On nice days, lightweight almost pajama-like (MicroTex) pants are awesome.
- Avoid vegetation that releases burrs. This type of pant picks burrs up.

1 Pair mid-weight hunting pants

- Sitka Mountain Pants are a good option

3 Layer Outerwear System

(If you run cold, bring a Primaloft insulated jacket or vest in addition to these layers)

1 Lightweight fleece or soft-shell jacket

1 Heavy hunting jacket for cold weather

- Wool or wool/synthetic is best.
- Cabelas Outfitter’s Woolmite/Windshear Jacket is a good option.
- Needs to have wind stopping attributes.

1 Full set of rain gear

- Helly Hansen produces the best rain gear we know of in terms of keeping dry, but uncomfortable if you are moving around a lot and it's not packable. Impertech is the preferred HH model of rain gear.
- If you see yourself hunting a lot in the rain (not just waiting it out), purchase the more expensive Sitka, Kuiu, or Rain Suede gear. It does a good job, is comfortable and is not noisy. We guide using Kuiu Yukon rain gear.
- Don't forget rain pants!

Other Clothing

2 Pairs of gloves

- One light weight and one heavier (wool is best) pair of gloves is optimal.
- We prefer glommits because they allow us to use our fingers. Several of us shoot recurves via finger release. Cabelas Big Game Glommits are a good choice.
- You can also wear dark pig skin leather gloves with separate wool liners for insulation if needed.
- Some of our archers choose to not wear gloves so they are better ready for shooting opportunities.
- Learn to quickly remove or shoot your bow with your chosen gloves.

1 Warm hat and/or baclava

- We usually wear wool beanies, but this is personal preference
- Light fleece hats can be plenty warmth during archery season

Camo face paint

- The tube kind works and travels the best

Archery/Hunting Gear

Bow

Arrows with extra broadheads and fieldpoints

- Work with an archery shop to setup a consistent set of arrows specifically geared towards elk and mule deer
- We do not make recommendations on arrow specifics because so much personal preference is involved. The important factor is that you have practiced and are confident at varying distances.
- You must safely pack your broad heads and arrows for packing on mules. Arrows must be in a hard tube. Large diameter pvc pipe with caps works well. Poster tubes also work. Broad heads must be packed off in a hard box or tin. No exceptions.

Release and an extra release

Arm guard if used

Spare parts for you bow

Allen wrench set

String wax

Sharpening file

Elk calls

- Learn how to use a cow call well. Bull bugles used too frequently and aggressively save more elk than any conservation effort. If you want to bugle, learn how to do a non-aggressive bugle or understand how to get close and use an aggressive bugle.

Wind indicator

Do not bring a pistol. It is just added weight and will not protect you any better than your bow.

Tool Gear

1 Head lamp

- A light with both a red and white light is best. Having multiple bulbs is a good backup and red is better while riding because the horses/mules are more comfortable with it.

1 Small flashlight

1 Small GPS

- Simple GPS's are fine. We use eTrex models that are small, easy to use, economical, and waterproof.

Extra batteries and bulbs for all equipment

Topo map and compass

- Check your compass to make sure it is pointing to North
- Do not store your compass near lead fishing weights or similar items. It is easy to reverse polarize today's cheaper compass. A reverse polarized compass will take you in the exact opposite direction.

Binoculars

- Your optics are the second most important piece of gear, right behind boots.
- We have had good luck with the top models from Nikon. Swarovski and other euro glass optics are worth the money if you plan to use them for years of hunting.
- Low-light performance is the most important variable.
- Nikon Trailblazer 10x50s that are waterproof and Leupold Compacts are good mid-range options. SLC and EL Swaros are good high-end optics.
- Cliff guides using 8x42 ELs because he prefers the light gathering of a 5mm+ exit pupil.

One of the best high end optics dealers on the planet is Jaret Owens in Ojai, CA. Jaret has a lifetime of guiding under his belt, has unbeatable pricing and treats people well. Give him a call at 805-551-6815 and tell him Colorado Cliff sent you.

Binocular Harness

- The original Alaska Guide Creations bino harnesses are a must have in our book.

Spotting Scope (optional)

- On hunts where we will be scoring animals, your guide will have a good scope
- A guide favorite is Vortex's Razor 20-60x85 or Swaro Modular ATX 85mm
- When not scoring animals, tripod compatible binoculars are generally better than a big scope for finding animals. If going this route, 15x56 Swaros are a worthy lifetime investment.

Rangefinder (optional)

- The best thing you can do is practice with an elk-sized target at known distances
- Do not practice with a whitetail or smaller target. This will cause you to underestimate the distance of live elk and mule deer
- Vortex makes an economical, high-quality range finder. Several of the European glass brands have nice range finding binoculars.

Knives and game cleaning

- We carry replaceable blade type knives as our primary game processing tool. Not having to sharpen and carry sharpening tools is a huge plus.
- Havalon and Razor-lite are good replaceable blade knives
- Some of us use axes for quartering, but your guide or drop camp will already be supplied with them.
- Have a classic fixed blade knife for utility jobs and getting around bone if you need to. We use foldable buck knives with 2-4" blades. Their Omni Hunter is a good knife.
- Small bone saws are not necessary. It's difficult to saw an elk pelvic bone with these small saws. Learn to short quarter elk (gutless method).

(Not needed on guided hunts. Having a good knife on you is always a good idea, but your guide will perform your field dressing for you.)

6 Game Bags

- We can hang your quarters in game bags at base camp in our cool cabin facility.
- Handful of surveyors tape to mark downed game, blood trails or signal your location
- Bags by T.A.G. Bag are pricey but awesome for long-term use. Lightweight too.

(Not needed on guided hunts. We provide game bags in our guided camp.)

Day pack

- A comfortable pack in the 1,300-2,200 cubic inch range

Camera

- Bring your charger and/or spare batteries
- The cold can quickly uncharge a charged battery

Two way radios if you are coming with a group

- Many of our guides carry these radios. Keep in mind that their range is limited in steep terrain.

Water bottle and/or hydration bladder

- Sturdy bladders that go in your day pack are best

Water purification tablets or water purifiers

- Many of our guides carry water purifiers, but carrying a light weight personal purifying method makes water stops quicker and easier.
- The most common way we sanitize water is by boiling. However, on long day hikes when you need to refill your water bottle in the field, having a lightweight purifying mechanism is great.
- Electrolyte tablets, like Nuun, improve the taste of purified water (tablet purified, filtered, or boiled) and add an energy boost.

A small hand stove (optional)

- An easy to use and light stove like the JetBoil are nice to have for quick water purification or making up a hot cup of tea or instant coffee in the field. You can also start a hell of a fire with them if you get into a bind.

Personal Gear

Sleeping bag

- For archery season a 0-10 degree rated bag is best.
- We prefer non-mummy type bags for comfort, this is personal preference

Personal Hygiene and Medication Items

- Make sure you have enough of any prescriptions

- If you have had anaphylaxis (allergic reaction) to bees or other insects, please carry an Epi-Pen at all times.
- Pepto-Bismol and other routine medications can be helpful
- Altitude medication if you have a history of altitude sickness
- Carry personal Aspirin as an immediate treatment for heart attack or pain.

(We carry extensive first aid kits in our guided camps. These include basic medication like Ibuprofen, Aspirin, Pepto, Imodium)

Baby Wipes

- No better bathroom wipe around

Chapstick and Sunscreen

Bug spray

Couple pairs of latex or equivalent gloves for cleaning game or first aid

An extra pair of eye glasses or contacts if you wear them

Scent control products

Soft duffle bags to pack most your gear in for packing on mules. Dry bags are best.

- Bags must weigh less than 50lbs a piece
- Water, camera, clothing layers are allowed in saddlebags. Other gear is not allowed.
- Wearing day packs while riding is prohibited on packin and packout

Super absorbent personal towel

- REI sells lots of good options that are packable, dry quickly and absorb an astonishing amount of water.
- Another good option is the ShamWow towels. The price is right too!

Garbage bags for trash

Safety Gear

Design a method to carry the bare essential safety gear on your person at all times. We carry small fanny pack type bags with this gear.

Fire starting capability

- Being able to start a fire quickly, without inducing yourself into a panic, can save your life.
- We use wax covered cotton balls or wax covered dryer lint as tinder that we always carry. These hold a flame for up to a minute in the worst conditions. Always carry tinder that you are confident using. **Do not depend on starting a fire from solely natural material.**
- Storm matches and water proof matches are good for starting fires here. High altitude can drastically affect the reliability of lighters.
- Have more than one way to start a fire on your person at all times

2 Heavy Duty Garbage Bags

- 2 mil+ 55 gallon contractor bags are best
- These bags work better than the thin, shiny safety blankets you find in first aid kits
- Cut a hole for your head and wear as a poncho to keep yourself warm and dry
- Heavy duty emergency bags (usually called emergencies bivys) are a good alternative

Extra Batteries and Bulbs for your Devices

Water purification tablets

Communication device

- In our contracts, we mandate that our hunters rent or we rent on their behalf, a satellite phone or satellite message system (Spot, InReach, etc...)

Parachute Cord 15-30ft

Whistle for signaling

Small 8x10 Tarp (optional)

- Can be bulky but great to put in the bottom of your day pack until the day you need it. Fantastic for extra warmth or a quick shelter from elements.

Zip ties

- Useful for a ton of different things from emergency shoe laces to making a quick shelter

First Aid Kit

Our guides carry first aid kits and our camps have first aid kits in them. Do not waste weight by carrying first aid items you won't use or do not know how to use. For example if you don't have any wilderness medicine training, a zip lock bag with Band-Aids, gauze, Neosporin, tweezers, Benadryl, Moleskin, soap and Ibuprofen is plenty.

If you are at risk of a heart attack, bring Aspirin.

Bring an Epi-Pen if you are allergic to any insects. You must get these via doctor's prescription.

Paper Work

Hunting license and tag

Fishing license if you plan to fish

Anyone born after Jan. 1, 1949 MUST have a Hunter's Safety Card to buy a Colorado hunting license. You must also carry your card with you while hunting!

Any remaining payment for your trip

- **We will not pack in hunters who have not completely paid for their trip.**
- Cash preferred. Cashier's checks are OK. **We do not accept personal checks or credit cards for the remaining balance.**

Important Items Our Guides Carry (Only applicable to guided hunts)

Knives

Radio or other communication

Fire starting capability

Tarp

Bivy bag or contractor's garbage bags

Rope or Parachute Cord

Compass

Surveyors' tape

Elk calls

Game bags

Garbage bags for trash

Game field dressing and quartering equipment

First Aid Kit:

Gauze pads, Combine dressing, Band-aids, Roller gauze, Occlusive dressings, Triangular bandage, Elastic wrap (Ace bandage), Sam splint or Wire splint, Exam gloves, 1 CPR Pocket mask, Blister kit (moleskin, second skin), Splinter tweezers, Medical tape
