Recommended Fall Bear Season Equipment List

General Considerations

The best gear you can bring is a pair of lungs and legs in the best shape possible. All the money in the world can't buy gear that will replace fitness at our high elevations.

Use all your gear before your trip. This especially applies to boots, day pack and safety equipment. New, not-worn-in boots can ruin a trip. Making sure your day pack fits well will make your trip more enjoyable.

If you are coming with a group that is hunting in the same camp, do not duplicate items. Work with each other to organize who brings what. Many places we hunt requires pack stock. We want to avoid packing unneeded weight.

Guns will be packed in scabbards on riding stock. We will not pack hard gun cases on our pack stock. In vehicles, we can pack hard cases. Please bring an inexpensive hard case for your bow. We will pack these bow cases on our pack animals.

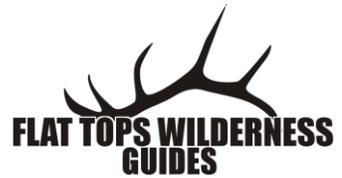

The weather in September is unpredictable and any day can turn out to be a winter day up in the high country. However, a large portion of our bear hunting area is only 9,000- 10,000ft. Days are usually mild, 50's to 70's, and nights around freezing.

Stay away from cotton, i.e. Carhartt, blue jeans, cotton socks, etc... When cotton gets wet it is useless and it will exacerbate suboptimal weather's effect on your body. Focus on wool and synthetics. There is a lot of newer technology clothing that is lightweight, packable, warm and dries quickly.

For current model/brand recommendations and links for where to purchase items visit [Our Current Gear Recommendations Page](#). This page is not a gearlist but instead a centralized repository of up-to-date suggestions of model/brand. There are no longer specific model/brand recommendations in the below gearlist. With new items coming out and other items being discontinued continuously, it's become impossible to keep the individual hunt gearlists up-to-date with model/brands.

At the end of this list, we include a list of what our guides carry that can be shared. If you are on a guided hunt you can choose to not carry/bring these items yourself.

Don't hesitate to give us a call about any specific gear questions.

A Note on Rifle Marksmanship

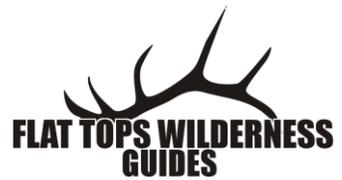

It is imperative that you shoot your rifle at the distances and angles you plan on hunting within, on the type of rest (shooting sticks, backpack, etc...) you plan on using in the mountains. Do not consider yourself the exception. Beyond zeroing your rifle, flat 100 yard bench shooting is worthless for prepping for our hunting conditions. In the past few years, we have seen a dramatic increase in misses and poor shot placement on our hunts. Please practice before arrival.

Marksmanship is a variable that you can control.

Most of our shots during rifle season will be 150-350 yards. A proficient 350-yard-shooter can hold a 4"-6" group at that range, in an angled environment, while shooting off a field rest (backpack, shooting, sticks, etc...). To achieve this takes dedicated practice.

If you want recommendations on shooting courses that are geared towards the mountain environment, give Cliff a call.

There isn't a place to shoot/zero your weapon at our facility. However, there is a fantastic public range only 40 minutes away in Gypsum, CO. Take a right at the only Hwy 70 Gypsum exit and follow the signs. The range has 100-250 yard flat lanes, in addition to 300-800 yard angle shots at animal profiles.

Boots and Footwear

1 Primary pair of waterproof hiking boots.

- A mountaineering type boot is best for folks interested in a physical bear hunt.
- For a more sit/glass/stalk, patient hunter, lightweight hiking boots do well on our bear hunts.
- Try to visit a retail location where you can try on different boot models. Fit is essential.
- Specific boot models [here](#).

1 Pair of camp shoes *Not needed if hunting from lodge.

- Something light and easy to pack like Crocs

4 Pair sock liners

- Thin liner socks will help you avoid blisters and allow you to pack fewer pairs of primary socks.
- We prefer ultra-thin, silk liners. Merino wool and synthetics will also work well.

4-5 Pair primary socks

Gators (Optional)

- Great in snow and/or rain. Also great when dealing with high, frosty or dewy vegetation
- Keep your boots and feet dryer

We keep an up-to-date [First Lite Layering Guide by Season](#) on our website.

Base Clothing

1-2 Pairs of base layers

- Synthetics and merino wool are good options
- Get different weights so you have flexibility for temperatures
- You will not need heavy, wool long underwear
- You can substitute synthetic boxer shorts if you know you run warm

Because of the hunter orange requirement, you don't necessarily need camouflage gear while rifle bear hunting. A lot of times you can save money by purchasing clothing that has

the same traits as hunting clothes, but is sold to the masses and is not camo. For archery hunters, all clothing should be camouflage. First Lite, Sitka and Kuiu patterns work well. Other patterns also work well.

Bring quiet gear. If it goes “swoosh” when you move, don’t bring it.

Daily Layers

All rifle hunters are required to wear at least 500 square inches of orange while hunting. You need to wear an orange hat.

1 Lightweight hunting shirts

1 Mid-weight hunting shirt

1 Pair mid-weight hunting pants

3 Layer Outerwear System ([Recommendations](#))

1 Lightweight fleece or soft-shell jacket

1 Insulating jacket/vest layer

1 Heavy hunting jacket for cold weather and driving on 4x4 vehicles

- Wool or wool/synthetic is best.
- Needs to have wind stopping attributes.

1 Full set of rain gear

- Don’t forget rain pants!

Other Clothing

1 Pair of gloves

- We prefer glommits because they allow us to use our fingers.
- You can also wear dark pig skin leather gloves with separate wool liners for insulation.
- Learn to quickly/safely remove or shoot your gun/bow with your chosen gloves. Sometimes this means removing the trigger finger part of your glove and/or glove liner.

1 Warm hat and/or baclava

- We usually wear wool beanies, but this is personal preference
- Light fleece hats can be plenty warmth during September

Hunting Gear

Rifle Hunting

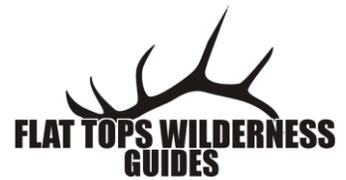

- Review the Colorado regulations to make sure your equipment is compatible with the state's caliber restrictions.
- Your scope is more important than your rifle.
 - Fog proof, waterproof and lowlight performance are most important
 - We prefer adjustable 3x-9x-40. 2x-7x and even fixed 4x work fine. Don't skimp on low light capability for a huge zoom. The animals we hunt are large so you don't need extreme zooms. Extreme zooms with small objectives are worthless.
 - Use high quality mounts. Getting into these areas can be a rough ride and your gun/scope will probably take some bumps.
- .270 is the minimum caliber we like to see people shoot. .300 calibers and above are most common.
 - The most important thing is that you are comfortable and accurate with your gun.
 - In our experience, large calibers cause more inaccuracy because people train themselves to flinch.
 - If you can't sit down and comfortably shoot 15 rounds, you are using too large of a caliber for you.
 - Sight your gun in at 2 inches high at 100 yards. On flat shooting rifles this means you can hold right on for any distance between 100-300 yards. Bears have a large enough vital area to accommodate the minimal bullet drop.

20 Rounds of ammo

Bow Hunting

Arrows with extra broadheads and fieldpoints

- Work with an archery shop to setup a consistent set of arrows specifically geared towards black bears
- We do not make recommendations on arrow specifics because so much personal preference is involved. The important factor is that you have practiced and are confident at varying distances.
- Unless arrows/broadheads are completely contained in a bow hardcase with the bow, you must safely pack your broad heads and arrows separately. This is for the safety of our pack stock. Arrows must be in a hard tube. Large diameter pvc pipe with caps works well. Poster tubes also work. Broad heads must be packed off in a hard box or tin.

Release and an extra release

Arm guard if used

Spare parts for you bow

Allen wrench set

String wax

Sharpening file

Additional:

Wind indicator

Do not bring a pistol. It is just added weight and will not protect you any better than your rifle.

Tool Gear

1 Head lamp

- A light with both a red and white light is best. Having multiple bulbs in the lamp is a good backup and red is better while riding because the horses/mules are more comfortable with it.

1 Small flashlight

Extra batteries and bulbs for all equipment

Topo map and compass

- Check your compass to make sure it is pointing to North
- Do not store your compass near lead fishing weights or similar items. It is easy to reverse polarize today's cheaper compass. A reverse polarized compass will take you in the exact opposite direction.

Binoculars

- Your optics are the second most important piece of gear, right behind boots.
- We have had good luck with the top models from Nikon. Swarovski and other euro glass optics are worth the money if you plan to use them for years of hunting.
- Low-light performance is the most important variable.
- Cliff guides use 8x42 ELs because he prefers the light gathering of a 5mm+ exit pupil.

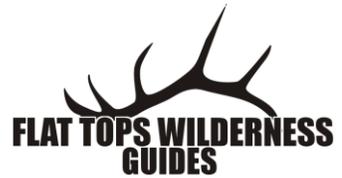

One of the best high-end optics dealers on the planet is Jaret Owens in Ojai, CA. Jaret has a lifetime of guiding under his belt, has unbeatable pricing and treats people well. Give him a call at 805-551-6815 and tell him Colorado Cliff sent you.

Binocular Harness

- [Harnesses we recommend](#)

Spotting Scope (optional)

- On hunts where we will be scoring animals, your guide will have a good scope
- When not scoring animals, tripod compatible binoculars are generally better than a big scope for finding animals. If going this route, 15x56 Swaros are a worthy lifetime investment.

Rangefinder (optional)

Knives and game cleaning

- [Knives we can recommend](#)
- Small bone saws are not necessary. It's difficult to saw a bear pelvic bone with these small saws.

(Not needed on guided hunts. Having a good knife on you is always a good idea, but your guide will perform your field dressing for you.)

4 Game Bags

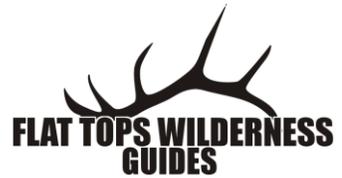

Day pack

- A comfortable pack in the 1,600-2,200 cubic inch range
- [List of Pack Recommendations](#)

Camera/Smartphone

- Bring your charger and/or spare batteries
- The cold can quickly uncharge a charged battery

Water bottle and/or hydration bladder

Personal Gear

Sleeping bag *Not needed if hunting from lodge.

- A 0-15 degree rated bag or warmer is best.
- We prefer non-mummy type bags for comfort, this is personal preference

Personal Hygiene and Medication Items

- Make sure you have enough of any prescriptions
- If you have had anaphylaxis (allergic reaction) to bees or other insects, please carry an Epi-Pen at all times.
- Pepto-Bismol and other routine medications can be helpful
- Altitude medication if you have a history of altitude sickness
- Carry personal Aspirin as an immediate treatment for heart attack or pain.

(We carry extensive first aid kits in our guided camps. These include basic medication like Ibuprofen, Aspirin, Pepto, Imodium)

Baby Wipes

- No better bathroom wipe around

Chapstick and Sunscreen

Bug spray

Couple pairs of latex or equivalent gloves for cleaning game or first aid

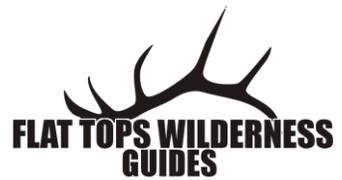

An extra pair of eye glasses or contacts if you wear them

Soft duffle bags to pack most your gear in for packing on mules. Dry bags are best.

*Not needed if hunting from lodge or from 4x4 camp

- Each bag must weigh less than 50lbs a piece
- Water, camera, clothing layers are allowed in saddlebags. Other gear is not allowed.
- Wearing day packs while riding is prohibited on packin and packout

Super absorbent personal towel *Not needed if hunting from lodge.

Safety Gear

Design a method to carry the bare essential safety gear on your person at all times. We carry small fanny pack type bags with this gear.

Fire starting capability

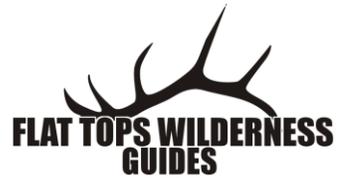

- Being able to start a fire quickly, without inducing yourself into a panic, can save your life.
- We use wax covered cotton balls or wax covered dryer lint as tinder that we always carry. These hold a flame for up to 15 minutes in the worst conditions. Always carry tinder that you are confident using. **Do not depend on starting a fire from solely natural material.**
- Storm matches and water proof matches are good for starting fires here. High altitude can drastically affect the reliability of lighters.
- Have more than one way to start a fire on your person at all times

2 Heavy Duty Garbage Bags

- 2 mil+ 55 gallon contractor bags are best
- These bags work better than the thin, shiny safety blankets you find in first aid kits
- Cut a hole for your head and wear as a poncho to keep yourself warm and dry
- Heavy duty emergency bags (usually called emergencies bivys) are a good alternative

Extra Batteries and Bulbs for your Devices

Water purification tablets *Not needed if hunting from lodge.

First Aid Kit

Our guides carry first aid kits and our camps have first aid kits in them. Do not waste weight by carrying first aid items you won't use or do not know how to use. For example if you don't have any wilderness medicine training, a zip lock bag with Band-Aids, gauze, Neosporin, tweezers, Benadryl, Moleskin, soap and Ibuprofen is plenty.

If you are at risk of a heart attack, bring Aspirin.

Bring an Epi-Pen if you are allergic to any insects. You must get these via doctor's prescription.

Paper Work

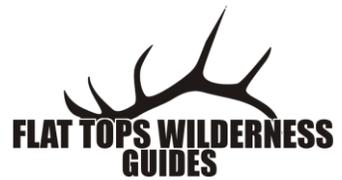

Hunting license and tag

Fishing license if you plan to fish – Non-resident tags are also a fishing license

Anyone born after Jan. 1, 1949 MUST have a Hunter's Safety Card to buy a Colorado hunting license. You must also carry your card with you while hunting!

Any remaining payment for your trip

- **We will not pack in hunters who have not completely paid for their trip.**
- Cash preferred. Cashier's checks are OK. **We do not accept personal checks or credit cards for the remaining balance.**

Important Items Our Guides Carry (Only applicable to guided hunts)

Knives

Radio or other communication

Fire starting capability

Tarp

Bivy bag or contractor's garbage bags

Rope or Parachute Cord

Compass

Surveyors' tape

Elk calls

Garbage bags for trash

Game field dressing and quartering equipment

First Aid Kit:

Gauze pads, Combine dressing, Band-aids, Roller gauze, Occlusive dressings, Triangular bandage, Elastic wrap (Ace bandage), Sam splint or Wire splint, Exam gloves, 1 CPR Pocket mask, Blister kit (moleskin, second skin), Splinter tweezers, Medical tape
