Mountain Lion Hunt Equipment List

General Considerations

The best gear you can bring is a pair of lungs and legs in the best shape possible. All the money in the world can't buy gear that will replace fitness. If you are overweight, try to shed a few pounds before your trip. If you smoke, try to quit.

Use all your gear before your trip. This especially applies to boots, day pack and safety equipment. New boots should be worn and broken-in before arrival. Making sure your day pack fits well will make your trip more enjoyable. If you have purchased new gear for your trip, familiarize yourself with how it fits and works before arriving.

Bring a hard case to transport your rifle or bow in vehicles/snowmobiles/ATVs.

Winter weather in Colorado is unpredictable and cold. Nights can be below zero and days can be anywhere from zero to 55 degrees. Be prepared for snow and don't let it bother you once it starts coming down. We monitor weather and potential snowfall.

Stay away from cotton. When cotton gets wet it is useless and it will exacerbate cold or wet weather's effect on your body. Focus on wool and synthetics. There is a lot of newer technology clothing that is lightweight, packable, warm and dries quickly.

In the below gear list, we offer a handful of recommendations based on what our guides currently use and endorse. However, other brands/models may be similarly effective. In regards to clothing, most of the major hunting brands (Kuiu, Sitka, First Lite, Stone Glacier, etc.) offer high-quality mountain gear that will serve your needs. We are not affiliated with any brand and our recommendations reflect that.

Please don't hesitate to give us a call/email about any specific gear questions!

Boots and Footwear

I - Primary Pair of Waterproof Hiking Boots

- A stiffer mountaineering-type boot is best.
- Visit a retail location so you can try on different boot models. Fit is essential.
- In steep terrain, the rigidity of the sole is more important than the boot height. Wearing boots that are uncomfortably high can cause “shin bump,” an uncomfortable sore spot on your shins.
- If your feet tend to get cold, a boot with light insulation performs best in snowy conditions.
- *Staff recommendations:*
 - Kennetrek Mountain Extreme (400g)
 - Crispi Guide GTX (200g)
 - Schnee’s Granite (200g)

I - Secondary Pair of Pac or Muck Boots

(Keep in mind, Pac boots are generally too bulky for stirrups while riding horseback.)

- With snow on the ground, a good set of rubberized Pac or Muck Boots work well as camp/backup footwear. Pac boots generally don’t have the traction or breathability of a hiking boot, but they offer a lot of warmth and they will work in a pinch if your primary boots fail. A backup pair of footwear also allows you to dry out your primary boots and be more comfortable around camp.
- *Staff recommendations:*
 - Kennetrek Grizzly Pac Boot

I – Pair of Camp Shoes

- Slippers or moccasins are great when you are indoors at night.

5 - Pairs Sock Liners

- Thin liner socks will help you avoid blisters and allow you to pack fewer pairs of primary socks.

5 - Pairs Primary Socks

- The best option is heavy-cushion wool.
- Darn Tough and Smartwool make great socks.

Gaiters

- Great in snow and/or rain. They also work well in high, frosty or dewy vegetation. They will keep your boots and feet dryer and warmer.

Snowshoes and Trekking Poles (Will be provided if you do not have any)

- Snowshoes and trekking poles are an incredibly useful combo when hiking through deep snow.

Base Layer Clothing

2 - Pairs of Base Layer Sets (Top and bottom)

- Synthetics and merino wool are best.
- Merino tends to hold less odor and is preferred as a next-to-skin layer.
- Get different weights so you have flexibility for temperatures.
- Zip-off varieties are great for active hunting. When your temperature rises, you can peel them off without removing your boots.
- *Staff Recommendations:*
 - First Lite Kiln 250 Merino-X (midweight)
 - First Lite Furnace 350 Merino-X (heavyweight)

Mid Layer Clothing

Camo clothing is not a necessity. There is no blaze orange requirement for lion hunters.

2 - Mid-weight Hunting Shirts or Hoodies

- Quarter-zips and hoodies make ideal mid-weight shirts.
- *Staff Recommendations:*
 - Sitka Core Heavyweight Hoody
 - First Lite Klamath

1 - Pair Mid-weight Hunting Pants

- Soft synthetic materials with some stretch will save you from rips and burrs.
- *Staff Recommendations:*
 - First Lite Corrugate Foundry
 - Sitka Timberline

1 - Pair Heavy-weight Hunting Pants

- Softshell pants with fleece backing work well in very cold conditions.
- *Staff Recommendations:*
 - First Lite Catalyst Pant
 - Kuiu Axis Hybrid Pant

Outerwear System (3 Layers: Light Insulation, Heavy Insulation, Shell)

- To be prepared for adverse weather, you should carry your outerwear system every day.

I - Lightweight Insulation (A vest, fleece, hoody, or jacket)

- *Staff Recommendations:*
 - Kuiu Ultra Down
 - Sitka Kelvin Lite

I - Heavy Insulation (Puffy jackets have the best warmth/weight ratio)

- *Staff Recommendations:*
 - Kuiu Super Down Pro Hooded
 - First Lite Chamberlin

I - Softshell Jacket (Must have wind-stopping attributes)

- *Staff Recommendations:*
 - Kuiu Guide DCS Jacket
 - First Lite Catalyst Jacket

I - Full Set of Rainwear (Don't forget rain pants!)

- *Staff Recommendations:*
 - Kuiu Yukon

Other Clothing

2 or 3 - Pairs of Gloves

- Bring light and heavy sets of gloves.
- There are some great options on the market for thin, lightweight gloves that offer some warmth but are dexterous enough to shoot with.
- Insulated leather work gloves with thinner wool liners are a versatile system.
- Gore-Tex gloves with heavy insulation (like the kind used for skiing and snow sports) are great for long sits or extreme temperatures, but you should practice removing them quickly for a shot.
- Hot Hands, Little Hotties, and other air-activated hand warmers are a great way to keep your fingers toasty inside a glove or pocket.

I - Warm Hat and/or Balaclava

- Beanies fit nicely in a pocket when you aren't using them and offer a lot of warmth when needed.
- *Staff Recommendations:*

- First Lite Tag Cuff Merino Beanie (blaze orange)

I - Lightweight Buff or Neck Gaiter

- Serves as a dual-purpose piece of clothing. On hot days, it can be used for sun protection and concealment. On cold days, it offers a little bit of warmth.

Archery/Rifle/Hunting Gear

Bring a pistol in addition to your bow or rifle. In caves and ledges, a pistol is the best weapon. Your pistol must produce 400ft/lbs. of energy at the muzzle. Calibers larger than 9mm are preferred. If you do not have a suitable pistol, our guides can provide you with one in the event that it is needed.

Rifle

- Review the Colorado regulations to make sure your equipment is compatible with the state's caliber restrictions.
- In our experience, deer-type calibers (.243, 30-30, 7mm-08, etc.) are best for taking mountain lions. They provide plenty of energy and will not cause extensive hide damage.
- Large objective, large magnification scopes are not necessary. Shots are typically under 100 yds.
- Many lion hunters are comfortable with lever-action rifles and open sights. Do not bring an open sight rifle unless you have practiced with it.

Ammunition – 20 rounds

Rifle Tools and Accessories

- Bring a quality hard case for transporting your rifle on snowmobiles/ATVs
- Bring Rem-oil or wipes for minor rifle maintenance in wet conditions.
- Bring any tools or accessories your weapon might need.
- Bring a good field rest that you have practiced with. You should have a system of several field rest options (backpack, bipod, natural rest, etc.) Be able to deploy your field rest and get on target quickly. In our experience, one of the best solutions are forestock-mounted bipods that extend enough to shoot from a seated position.
- Keep in mind, rifles with bipods will not fit in scabbards while horseback. The best bipods are those with a quick-release function.
- *Staff recommendations:*
 - Hatch Bipod

Bow (If archery hunting)

Arrows with Extra Broadheads and Field Points

- Work with an archery shop to set up a consistent set of arrows.
- We are hesitant to make recommendations on arrow specifics because so much personal preference is involved. The important factor is that you have practiced and are confident at varying distances.
- You must safely pack your broad heads and arrows for packing on mules. Loose arrows and broadheads will not be packed. They need to be in a hard tube or in the bow case.

Release (and an extra)

- If you use a hinge or back tension release, be extra vigilant that you don't misplace it while in the field!

Arm Guard (optional)

Spare Parts for Your Bow and Sight

Allen Wrench Set

String Wax

Sharpening File (optional)

Tool Gear

2 – Head Lamps

- Bring a light with both white and red bulbs.
- Bring an extra in your daypack.
- *Staff Recommendations:*
 - Princeton Tec Remix LED
 - Petzl Tactikka

I - Small Flashlight

I - Small GPS

- With the advent of phone applications like OnX, GPS devices have become increasingly obsolete. For hunters who want a back-up to their primary device, GPS watches or small handhelds like the Garmin eTrex and Garmin Rhino will serve your needs.

Extra Batteries (For all equipment)

- Examples: AAA (headlamps/flashlights,) AA (many handheld radios,) CR2 (rangerfinder)

Topo Map and Compass

- Even with today's technology, an old-fashioned compass and topo map can still be a useful navigation system.
- USGS quad maps can be found at many outdoor retail stores.
- www.mytopo.com is also a great source for custom-printed topo maps.
- Check your compass to make sure it is pointing to true North
- Do not store your compass near lead fishing weights or similar items. It is easy to reverse polarize today's cheaper compasses. A reverse polarized compass will take you in the exact opposite direction.

Binoculars (optional)

- Your guide will carry binoculars to age/sex a treed lion.
- While binoculars are not necessary on a mountain lion hunt, they can be a nice addition. If you enjoy wildlife-watching, there will be many opportunities to do so while looking for cat tracks.
- 10x42 binoculars seem to be the best balance of magnification/objective for active hunting.

Binocular Harness and Rangefinder Pouch

- Binocular harnesses should fit close to the chest so they don't affect your shooting sequence.
- Be sure to practice shooting your bow/rifle while wearing your chest-mounted optics.
- Lids that fold away from the body (rather than toward) are easier to operate one-handed.
- *Staff Recommendations:*
 - Outdoor Vision
 - Marsupial Gear

Rangefinder (For archery hunters)

- Many misses are simply a result of misjudged distance.
- Practice using your rangefinder at home and use it constantly while hunting. Anytime you pause, range your surroundings. Whenever possible, you should range your target before taking a shot.
- Most modern rangefinders have an angle compensating feature. Be sure yours does and understand how to operate it.

Knives and Game Processing

(Not required for guided hunts. Having a good knife on you is always a good idea, but your guide will perform your field dressing for you.)

- We usually carry at least three knives while hunting:

- A 4-inch fixed-blade knife can be used for the majority of your skinning and quartering.
- A small, ultra-sharp replaceable blade knife can be used for detail work and face-capeing.
- An EDC folding or sheath knife. This knife should be used for camp chores, cutting rope, joints, and any other task that might dull or damage your primary skinning blade.
- *Staff recommendations:*
 - Benchmade Steep Country (fixed-blade skinning)
 - Havalon Piranta (replaceable blade)
 - Benchmade Bugout (EDC)

6 - Game Bags

(Not needed on guided hunts. Our guides will provide game bags.) .

- Bring a handful of surveyor's tape or toilet paper to mark downed game, blood trails or signal your location. Remember to "Leave No Trace" and remove any markers at the end of your hunt.

Day Pack

- Choose a comfortable pack in the 1,300-2,200 cubic inch range
- *Staff Recommendations:*
 - Mystery Ranch Pintler (lightweight, comfortable)
 - Kifaru Hellbender (daypack with meat-hauling capability)

Camera/Smartphone

- Many hunters now use their Smartphone as a primary means of navigation using apps such as OnX and Gaia GPS.
- Cell phone service is a rarity in our permit area. Be sure you have downloaded "offline" maps for the areas you intend to hunt.

Charging Devices and Chords

- Bring all the necessary power chords to charge your devices
- Power banks have become affordable and readily available in recent years.
- Keep a small, single-use, lightweight power bank and chord in your daypack for emergency use.
- Cold weather can quickly drain a battery. Consider keeping your device in a next-to-body pocket while hunting.

Two-way Radios

- Our guides always carry two-way radios.
- They can be very useful if you are coming with a group.

- Keep in mind that their range is limited. They will perform best in line-of-sight applications.

Water Bottles and Hydration Bladder

- Bladders and hoses can be problematic in sub-freezing temperatures. We prefer bottles on cold weather hunts.

Water Purification System

Many of our guides carry water purifiers, but a light weight personal purifying method makes water stops quicker and easier.

- The most common way we sanitize water in camp is by boiling or using a gravity filter. However, on long day hikes when you need to refill your water bottle in the field, having a lightweight purifying mechanism is great.
- Electrolyte tablets, powders, and concentrates improve the taste of purified water (tablet purified, filtered, or boiled) and add an energy boost.
- *Staff recommendations:*
 - Platypus GravityWorks Water Filter
 - Katadyn Steripen UV Water Purifier

Backpacking Stove (optional)

- An easy to use and light stove like the JetBoil are nice to have for quick water purification or making up a hot cup of tea or instant coffee in the field. You can also start a hell of a fire with them if you get into a bind!

Personal Gear

Personal Hygiene and Medication Items

- Make sure you have enough of any prescriptions
- If you have had anaphylaxis (allergic reaction) to bees or other insects, please carry an Epi-Pen at all times.
- Pepto-Bismol and other routine medications can be helpful
- A travel-size bottle of Gold Bond Powder is helpful in relieving chafe, blisters and dealing with “monkey butt.”
- Bring altitude medication if you have a history of altitude sickness
- Carry personal Aspirin as an immediate treatment for heart attack or pain.

(We carry extensive first aid kits in our guided camps. These include basic medication like Ibuprofen, Aspirin, Pepto, Imodium)

Baby Wipes

- No better bathroom wipe around!

Chapstick and Sunscreen

Latex gloves for cleaning game or first aid

An extra pair of eye glasses, contacts and solution if you wear them

Garbage bags for trash (Not required on guided hunts)

Safety Gear

Design a method to carry the bare essential safety gear on your person at all times. Redundancy is key. For example, you should carry a lighter in your pocket, your bino harness, and your backpack.

Fire Starting Capability

- Being able to start a fire quickly, without panic, can save your life.
- We use wax covered cotton balls or wax covered dryer lint as tinder that we always carry. These hold a flame for up to a minute in the worst conditions. Always carry tinder that you are confident using. **Do not depend on starting a fire from natural material.**
- Storm matches and water proof matches are good insurance for starting fires. High altitude and cold temperatures can drastically affect the reliability of lighters.

2 Heavy Duty Garbage Bags

- 2 mil+ 55 gallon contractor bags are best
- Believe it or not, these bags are a better bivvy alternative than the thin, shiny safety blankets you find in first aid kits
- Cut a hole for your head and wear as a poncho to keep yourself warm and dry
- Can also be used as a meat tarp or to protect your backpack from blood.

Water Purification Tablets

- Tablets or chemical treatments are a lightweight emergency water purification option.

Communication Device (Carried by guides)

Parachute Cord 15-30ft

Whistle (For Signaling)

Small Backpacking Tarp (optional)

- Can be bulky but great to put in the bottom of your day pack until the day you need it. Fantastic for extra warmth or a quick shelter from elements.

Zip Ties

- Useful for attaching tags, emergency shoe laces, making a quick shelter

Tape

- A small roll of electrical tape has many practical uses. Many hunters use a strip to keep their bore from collecting rain, snow, and debris.
- Duct tape or Gorilla Tape can be useful for gear repairs.

Pen/Small Notebook

(Not required on guided hunts)

- Necessary for signing and validating a filled tag.
- Can be used to leave notes at camp for FTWG staff or others in your group.

First Aid Kit

- Our guides carry first aid kits and our camps have first aid kits in them. Do not waste weight by carrying first aid items you won't use or do not know how to use. For example, if you don't have any wilderness medicine training, a zip lock bag with Band-Aids, gauze, Neosporin, tweezers, Benadryl, Moleskin, soap and Ibuprofen is plenty.
- If you are at risk of a heart attack, bring Aspirin.
- Bring an Epi-Pen if you are allergic to any insects. You must get these via doctor's prescription.

Paper Work

Hunting License and Tag

Fishing license and equipment if you plan to fish

Anyone born after Jan. 1, 1949 MUST have a Hunter's Safety Card to buy a Colorado hunting license. You must also carry your card with you while hunting!

Please bring any remaining payment for your trip

- **We will not pack in hunters who have not completely paid for their trip.**
- Cash preferred. Cashier's checks are OK. **We do not accept personal checks or credit cards for the remaining balance.**

Important Items Our Guides Carry (Only applicable to guided hunts)

Knives

Pen

Radio or other communication

Fire starting capability

Tarp

Bivy bag or contractor's garbage bags

Rope or Parachute Cord

Surveyor's tape

Game bags

Garbage bags for trash

Game processing and field dressing equipment

First Aid Kit:

Gauze pads, Combine dressing, Band-aids, Roller gauze, Occlusive dressings, Triangular bandage, Elastic wrap (Ace bandage), Sam splint or Wire splint, Exam gloves, 1 CPR Pocket mask, Blister kit (moleskin, second skin), Splinter tweezers, Medical tape
